Objective

To catch up with the revolution in the global Information Technology. Bangladesh needs 'High Skilled IT Professionals' who will design and develop the core IT structure of the country and at the same time country needs operational-IT professionals who will run and execute the IT activities and maintain the IT infrastructure. In fact country needs large number of operational manpower in comparison with the required number of developers and designers. From this viewpoint the objective of this program is to produce operational IT professionals. The courses of this program has been designed after discussion with the IT professionals from local IT industry in Bangladesh to know the type of demand for these type of operational IT manpower in their industries. Therefore the courses for this program will cover the practical knowledge on computer hardware, networking, databases management system, web design and computer graphics.
